**NEW**  
January 2020

Products need labeling  
Print modules  
for industrial use

**PX Q**

Made in Germany

## Print modules PX

Full functionality, high reliability, comfortable operation and low downtime related to maintenance! The PX Q print and peel-off module has been designed specifically for printing and labeling fully automatically in industrial applications. It can be integrated in any orientation of assembly to solve even complex marking tasks.

A torsion-resistant cast aluminum construction is basis to assemble all the components of the print mechanics. Food-safe coating and stainless steel casings add to the perfect shape with special features. Screwing is compatible to the devices of competitors.

### The universal one

Industrial device for accurate imprint

Print module		PX Q4.3		PX Q4	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	250	250	300	150
Print width	up to mm	104	108.4	105.7	105.7

### The wide one

Suitable for Odette and UCC labels

Print module		PX Q6.3	
Printable resolution	dpi	203	300
Print speed	up to mm/s	250	250
Print width	up to mm	168	162.6

## Directions of label transfer

All the print modules are provided as left-hand and right-hand versions. As for printable resolutions, PX Q users can choose from 300 and 600 dpi, the PX Q4.3 and PX Q6.3. offer 203 and 300 dpi.

# Details

## 1 Operation panel

Operating the device is intuitive and simple with the help of self-explanatory symbols to configure settings

## 2 Ribbon holder

Three-part tightening axles enable the ribbon to be replaced quickly and easily.

## 3 Rugged metal chassis

made of cast aluminum; basis to assemble all units

## 4 Plungers

One plunger is fixed on the inner side. A second one is moved that far to the label margin, until a good print image evokes.

## 5 Print head

All print heads are freely interchangeable at equal width. Easy replacement

## 6 Automatic ribbon saving (option)

The print head is lifted during label feed and the ribbon is stopped.

## 7 Print roller removal

It can be easily removed or inserted in the cases of cleaning or wear.

## 8 Simple replacement of materials

Label materials are inserted until lateral stop. The print head and wipe-down rollers are locked by levers.

## 9 Label sensor

A gap sensor or a reflective sensor position the imprint precisely on the label and detect the end of the material.

## 10 Material backfeed

After a label has been peeled off, the next one can be retracted to behind the print line. By this, the whole label can be printed and adhesive leaking is avoided during a longer pause. In case sensitive materials are processed and to prevent the ribbon from wrinkling, the print head can be lifted.

### Imprint accuracy

The smaller a label, the higher are the requirements on the imprint accuracy. With the help of the adjustable slip correction, print offset can be reduced by  $\pm 0.2$  mm.

# Operation panel

Operating the device is intuitive and simple with the help of self-explanatory symbols to configure settings.

- 1 **LED signal:** Power ON
- 1 **Status bar:** data reception, record data stream, ribbon pre-warning, SD memory card / USB memory stick plugged in, Bluetooth, WLAN, Ethernet, USB slave, time
- 3 **Printer status:** Ready, Pause, number of labels printed in a print job, label in peel-off position, awaiting external start signal
- 4 **USB slot** to connect the Service Key or a memory stick, in order to transfer data to the IFFS memory
- 5 **Operation**
  -  Print label
  -  Jump to menu
  -  Reprint last label
  -  Interrupt and continue print job
  -  Stop and delete all print jobs
  -  Label feed

Setup options

Print parameters

Print position Y

Print speeds

Depending from the orientation of assembly, display is either in landscape or portrait mode.

Printer rotated by 90°

Video tutorials

# External operation panel

providing the same functionality as on the printer

Display in landscape or portrait mode

Users are free to choose whether to operate the printer on the external panel or on the one integrated in the device.

Printer connection: USB 2.0 Hi-speed device

- 1 **LED signal:** Power ON
- 2 **USB slot** to connect the Service Key or a memory stick, in order to transfer data to the IFFS memory
- 3 **Connecting cable USB**, lengths 1.8 to 16 m  
If length succeeds 3 m, use only specified cables.  
For dimensions see assembly instructions

## Print heads

**All print heads are freely interchangeable at equal width. They are automatically detected and calibrated by the CPU. The print distance to the locating edge can be adjusted.**

Major data such as running performance, maximum operating temperature and heat energy are directly stored in the print head. The data can be read at the plant.

**Print heads for print module PX Q4 - 300, 600 dpi**

providing sharp-edged print images  
suitable for small fonts and graphics on typeplates  
suitable for markings on materials with high energy needs

**Print heads for print modules PX Q4.3 and PX Q6.3 - 203, 300 dpi**

durable; suitable for rough surroundings and thermal direct printing

## Print rollers

**Two types of material:**

**Print rollers DR**

Coating: synthetic rubber  
They suit for highly accurate imprint and are provided as standard.

**Print rollers DRS**

Coating: silicone  
They have an extra long service life at a higher imprint tolerance.

## Interfaces

- 1 to connect a **SD memory card**
- 2 **2 x USB Host** to connect a Service Key, USB memory stick, keyboard, USB Bluetooth adapter, USB WLAN stick, an external operation panel
- 3 **USB 2.0 Hi-speed device** to connect a PC
- 4 **Ethernet 10/100 Mbit/s**
- 5 **RS232C** 1,200 to 230,400 baud/8 bit

**Digital I/O interfaces;** compliant with IEC/EN 61131-2, type 1+3  
All inputs and outputs are galvanically isolated and protect from reverse polarity. In addition, outputs are short circuit protected.

- 6 **Digital I/O interface 24 VDC;** 25 pin SUB-D socket connector

**Inputs PNP**

# Label software cablabel S3

## Designing, printing, administrating

cablabel S3 opens up the full potential of cab devices. First of all, the label must be designed. cablabel S3 is of a modular design which makes it adaptable to requirements step by step. To support functions like native JScript programming, elements such as the JScript Viewer are embedded as plug-ins. The designer user interface and the JScript code are synchronized in real time. Special functions like the Database Connector or barcode testers can be integrated.

For further information see  
[www.cab.de/en/cablabel](http://www.cab.de/en/cablabel)

## Stand-alone printing

This operating mode is the printer's ability to select and print labels even when it is not connected to a host system.

The label has to be designed with a software such as cablabel S3 or by direct programming with a text editor on a PC. Label formats, texts, graphics as well as database contents are stored on a memory card, a USB memory stick or in the internal IFFS memory.

Only variable data are sent to the printer via a keyboard, a barcode scanner, scales or other host systems and/or recalled by the Database Connector from the host and printed.

## OPC UA

cab printers of the current generation are ready to interact with machines and components of different manufacturers in industrial plants.

An OPC UA server and client is part of the firmware.

The server enables printer configuration and control, while dynamic print data can be prepared via a defined programming interface.

With a client integrated, data fields from other OPC UA-enabled machines can be read and put on the label without the need for an additional software component.

# Printer control

## Drivers

To control the printer with a software other than cablabel S3, cab provides drivers in 32 / 64 bit for operating systems starting from Windows Vista, Mac OS 10.6 and Linux with CUPS 1.2.

### Windows<sup>1)</sup> drivers

cab printer drivers are WHQL-certified. They ensure optimum stability on the Windows operating system.

### Mac OS X<sup>2)</sup> drivers

cab provides CUPS-based printer drivers for Mac OS X applications.

### Linux<sup>3)</sup> drivers

Linux drivers are CUPS-based.

Drivers are offered on the DVD delivered with the printer and for free download at [www.cab.de/en/support](http://www.cab.de/en/support)

## Programming

### JScript

To control the printer, cab has developed the embedded programming language JScript. See manual for free download at [www.cab.de/en/programming](http://www.cab.de/en/programming)

### abc Basic Compiler

In addition to JScript and as an integral part of the firmware, it allows advanced printer programming before data are sent to printout. For example, external printer languages can be replaced without interfering in the current print job. Also data from other systems such as a scale, a barcode scanner or PLC can be integrated.

## Integration

### Printer Vendor Program

As a partner in SAP's<sup>4)</sup> Printer Vendor Program, cab has developed a replace method to enable easy control of a cab printer via SAPScript from SAP R/3. Only variable data are sent to the printer by the host. Pictures and fonts that had priorly been stored in the local memory (IFFS, memory card, etc.) are merged.

<sup>1)</sup> Windows is a registered trademark of Microsoft Corporation

<sup>2)</sup> MAC OS X is a registered trademark of Apple Computer, Inc.

<sup>3)</sup> Only for device series SQUIX (except of SQUIX MT), MACH 4S, EOS, HERMES Q and PX

<sup>4)</sup> SAP and all corresponding logos are trademarks or registered trademarks of SAP SE

# Printer administration

## Configuration in Intranet and Internet

The HTTP and FTP server integrated in the printer via standard programs like a web browser or FTP clients allows printer control and configuration, firmware updates and memory card administration. Via email or SNMP, the SNMP and SMTP client datagram sends status, warning and error messages to administrators and users. Time and date are synchronized by a time server.

## Network Manager in preparation

It is possible to simultaneously manage several printers within the network. Control, configuration, firmware updates, memory card administration, data synchronization and PIN administration are supported from one single location.

## Database Connector

Printers connected to a network may directly access data from a central ODBC or OLEDB-ready database and print it on a label. While printing, data can be rewritten to the database.

## Accessories

2.1		<b>SD memory card 8 GB</b>
2.2		<b>USB memory stick 8 GB</b>
2.3		<b>USB WLAN stick</b> 2.4 GHz 802.11b/g/n Hotspot or Infrastructure Mode
2.4		<b>USB WLAN stick with a rod antenna</b> for extended reach 2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac Hotspot or Infrastructure Mode
2.5		<b>USB Bluetooth adapter</b>
2.6		<b>2-Port Ethernet Switch 10/100 Mbit/s</b>
2.7		<b>I/O interface connector SUB-D, 25 pin</b> with clamping screws to connect all control signals to the I/O interface
2.8		<b>I/O interface connector SUB-D, 15 pin</b> with clamping screws to connect a cable
2.9		<b>Print rollers DRS</b> Coating: silicone They have an extra long service life at a higher imprint tolerance.

2.10		<b>External operation panel</b> If the operation panel is not accessible after printer installation, an external one can be additionally connected.
		<b>Connecting cable USB</b> , length 1.8 m
		<b>Connecting cable USB</b> , length 3 m
		<b>Connecting cable USB</b> , length 5 m
		<b>Connecting cable USB</b> , length 11 m
		<b>Connecting cable USB</b> , length 16 m
2.11		<b>Label selection - I/O box</b> Up to 16 different labels can be selected from a memory card by a master control, e.g. PLC.
2.12		<b>Connecting cable RS232 C</b> 9/9 pin, length 3 m
2.13		<b>Interface cover</b> to prevent slots from humidity and contamination

Functionality of the device and compliance to CE standards are guaranteed only in association with accessories provided or recommended by cab.
